- a. Turn on the handle, the faucet is in the state of faucet (bathtub).
- b. To switch from the faucet to the shower (shower), just pull up the lifting head or press the button, and the faucet will switch to the shower;
- c. If you want to change the water from the shower back to the spout, please close the handle first, the lift head will automatically fall back (the button will pop up to reset), and then open the handle. At this time, the spout is in the state of discharging water. Do not press the lift head forcibly Or button to avoid damaging the converter components.

Note: For lifting converter products, our products have a low-voltage protection function. When the water pressure is too low to keep the shower water flowing, you can pull up the lifting head and rotate it 90 degrees. When the water pressure returns to normal, the protection must be released. Setting, the lifting head needs to be rotated 90 degrees again, then the lifting head can automatically fall back.
